SUMMARY

Experienced and accomplished full-stack Senior Software Developer with over 15 years of proven success in software development, as well as 5 years of experience in leading projects as an architect, developer, and programmer analyst. Skilled in developing enterprise-level applications from inception to delivery. While Laravel, VueJS, and MySQL stack are my favorite technologies, I have extensive experience working with a wide range of technologies, which has equipped me with the ability to overcome any obstacle.

WORK EXPERIENCE

Lead Fullstack Developer

Sun-X

📅 05/2023　　📍 Munich
🔗 https://sun-x.energy/

- Led the full-stack development of a project with a microservices architecture, collaborating with a Python-based data science team
- Architected a scalable database from scratch, optimized for performance, and implemented microservices-based APIs, enhancing data retrieval speed from 1 minute to 3 seconds
- Reviewed and improved code quality for a team of developers across PHP, Laravel, and Python, deployed projects using GitLab CI/CD, and streamlined deployment processes, reducing deployment time

Senior Frontend Engineer

Small Planet

📅 03/2022 - 04/2023　　📍 New York
🔗 www.smallplanet.com

- Lead the development of web applications using ReactJS, and VueJS
- Optimize existing codebases for performance and scalability, resulting in a 20% improvement in page load times and a 30% increase in user engagement
- Develop custom reusable components using Gutenberg thus reducing development time for the content managers and UX/UI designers

Full Stack Senior Developer

Code Line Solutions

📅 01/2019 - 03/2022　　📍 Sarajevo
🔗 https://codelinesolutions.com/

- Led a team of four people in delivery of enterprise CRM. In addition, served as the primary architect for the project database. (Laravel + PHP + VueJS + SQL)
- Engineered a stand-alone application that facilitates the visualization of office spaces and integrates with the HR module, enabling the development of a ticketing system for managing seating spaces during corona. Written over 20.000 lines of code in 10 days!
- Conceptualized and developed a JavaScript templating engine that integrated and consolidate four distinct data types to generate comprehensive and actionable performance reports (JavaScript + ChartJS + MMSQL + MySQL + PostgreSQL + JSON)

Software Developer

Alfa Energy (an Edison Energy company)

📅 05/2013 - 01/2019　　📍 London
🔗 https://alfaenergygroup.com/uk/

- Developed intranet software, a comprehensive enterprise-level application that included a wide range of modules, such as employee productivity, human resources, price comparisons, company details, and storage for various products. (PHP + AngularJS + mySQL)
- Designed and developed AlfaGoals, a visually stunning application that enables users to track and monitor energy procurement metrics across different employee groups, teams, and locations.(PHP + Ember.JS +AnimeJS + MySQL)
- Developed an enterprise-grade internal application to efficiently manage equipment inventory, purchase orders, and employee accountability for equipment usage. (VBA)

EDUCATION

Master of Business Administration (MBA)

University of Zagreb

📅 2012 - 2013

Grade
9.8 / 10

Bachelor of Science and Technology

University of Buckingham

📅 2007 - 2011

GPA
3.2 / 4.0

SKILLS

PHP | Laravel | JavaScript | VueJS | SQL | AWS | Azure | MySQL | MMSQL | PostgreSQL | API

Sass | Heroku | JQuery | Ruby | ChartJS | AngularJS | ReactJS | Git | NodeJS | Vuex | Docker

PHPUnit | DataTables | CSS | Bootstrap | Tailwind | Magento | VBA | Drupal | Wordpress | Forge

PERSONAL PROJECTS

Movie search engine based on natural language

Created a movie search engine that leverages natural language processing (NLP) techniques to enable users to search for movies using everyday language. The engine was developed using a word dictionary approach, enabling the recreation of machine learning models to deliver accurate search results. (Laravel + VueJS + PostgreSQL + Python)

Reddit Clone

Developed a robust and scalable clone of Reddit, a popular social media platform that allows users to share, comment, and vote on user-generated content. (Laravel + VueJS + MySQL)

Kvisko

During the COVID-19 pandemic, created a comprehensive quizzing platform that enables users to connect, interact, and engage in competitive quiz-based activities. (VueJS + NodeJS + ExpressJS + Firebase)

No child without a gift

Project Manager - Volunteer
- Raised donations and created New Years gifts for over 5000 children

CERTIFICATION

Ruby on Rails
Academy387 - 2015

Bulletproof Web
Academy387 - 2014

Data Protection
DataGuard - 2024

Intermediate PostgreSQL
Academy387 - 2020

VOLUNTEERING

President and Co-Founder
Ruku na Srce - Charity Organization
📅 2011 - 2020

AWARDS

💎 **Most Valued Alfarian Award**

INTERESTS

Playing Chess and reading books. Current Lichess rating: 2000, not your average GM, however I can carry myself surprisingly good over the board.
